

POWER ALERT 1

Stage 6 loadshedding will be implemented from 16:00 this afternoon until 05:00 on Friday. Thereafter, Stage 4 loadshedding will be implemented from 05:00 on Friday until 05:00 on Saturday.

Thursday, 01 June 2023: Stage 6 loadshedding will be implemented from 16:00 this afternoon until 05:00 on Friday. Thereafter, various stages of loadshedding will be implemented over the weekend as per the loadshedding table below:

Loadshedding schedule for 1 – 4 June 2023

Published Thursday, 1 June 2023

Date	Day	Start time	End time	Stage
01 June 2023	Thursday	-	16:00	4
		16:00	24:00	6
02 June 2023	Friday	00:00	24:00	4
03 June 2023	Saturday	00:00	05:00	4
		05:00	16:00	2
		16:00	24:00	4
04 June 2023	Sunday	00:00	05:00	4
		05:00	16:00	-
		16:00	24:00	4

Eskom will publish another update as soon as any significant changes occur.

Breakdowns are currently at 17 863MW of generating capacity while the generating capacity out of service for planned maintenance is 2 437MW.

Over the past 24 hours, a generating unit each at Kendal and Tutuka power stations were returned to service.

In the same period, a generation unit each at Duvha and Arnot power stations were taken out of service due to breakdowns. The further delays in returning to service a generating unit at Arnot, Hendrina, Lethabo, Majuba, Matimba, Matla, Tutuka and two generating units at Camden power stations continue to add to the current capacity constraints. Eskom intends to return as many of these generating units to service over the next few days.

We thank those South Africans who do heed the call to use electricity sparingly and efficiently, including switching off geysers from 17:00 to 21:00, in helping to alleviate the pressure on the power system and avoiding higher stages of loadshedding.

ENDS
